

Corporate Responsibility

2016 PRIORITY ISSUES FOR SHAREHOLDER ACTION

Protection of Human Rights

Human Trafficking

Goal: Promote corporate policies and practices that ensure basic human rights for all peoples and deter exploitation, with a special focus on women and children, related to forced labor, slavery and sexual exploitation.

Healthy Persons and Communities

Global access to medicines in developing countries

Goal: In support of the human right to health, promote corporate policies and practices of global pharmaceutical companies to enhance access to drugs to treat serious diseases in developing countries.

Environmental Sustainability

Water access and sustainability

Goal: Promote corporate policies and practices that respect the human right to water and the responsible and effective use and discharge of water ("water stewardship") by companies in their business operations.

Climate change and the environmental impact of company operations in various sectors

Goal: Promote corporate policies and practices designed to improve the environmental impacts of company operations and products in industry sectors that are significant contributors to greenhouse gas emissions.

Sustainable food production

Goal: Promote company practices and policies designed to promote sustainable food production that is safe for humans and the environment.
